

COMPANY PROFILE

Total Systems International (TSI) specializes in water treatment and specialty facility components for manufacturing facilities. TSI principals have over 70 years of combined experience providing water treatment solutions for microelectronics and bio-pharm production facilities worldwide. This experience includes:

- Process Design
- System Design and Engineering
- Hardware Design and Engineering
- Software Design and Engineering
- Equipment Supply and Manufacturing
- Turn-Key Installation
- Project Management
- System Commissioning
- Operator Training
- System Operation
- Problem Troubleshooting and Resolution
- Spare Parts
- Consumables
- Chemical Supply
- Specialty Clean Room Components

The experience of TSI principal's and associates include services provided to worldwide leaders in microelectronics and bio-pharm products manufacturing. The TSI principals began serving the industry in 1985 as Wastewater Treatment Systems (WTS), a San Jose California based company. WTS become an internationally recognized leader providing water treatment solutions to the microelectronics and bio-pharmaceutical industries. During the mid 1990's WTS was acquired by USFilter to provide expertise for the treatment of wastewater from microelectronics and bio-pharm facilities. In 1999 USFilter was acquired by the French company Vivendi, at which time the founders of WTS left USFilter and created Total Solutions International. In 2003 the name was changed to Total Systems International, LLC to separate the consulting business from the equipment (systems), after market parts, supplies and services business. Today the principals of TSI continue to provide the superior products and services they have become well recognized for during the last 21 years.

Having participated in the rapid growth of the global microelectronics and bio-pharmaceutical industries since the late 1970's, TSI principals have developed in depth knowledge of industry manufacturing processes and facility operations. TSI continues to expand and update this knowledge base to assure our solutions meet the changing needs of the industry's we service. This constantly evolving knowledge base, combined with our expertise in water treatment technologies allows TSI to assist our clients in providing the most effective solutions to meet their facilities requirements.
